- Design: Responsive UI, Mobile-First Development

PROFESSIONAL EXPERIENCE

ORGGLOBAL TECH NETWORK

Frontend developer (freelance)

NOV 2025-PRESENT

- Developed and implemented responsive web interfaces, ensuring cross-browser compatibility and optimal user experience.
- Executed comprehensive Quality Assurance (QA) testing protocols on web applications to guarantee adherence to functional specifications and minimize defects.
- Assisted in the integration of frontend components with backend services (APIs).
- Participated in Agile development rituals, including sprint planning and daily stand-ups, contributing actively to project workflows.
- Maintained and updated technical documentation for new features and processes.

AJAEQ

Junior Frontend Developer

JAN 2026 – PRESENT

- Developed and optimized the main landing page and high-traffic waitlist system for AJAEQ, ensuring seamless responsive layouts and robust user-input validation.
 - Migrated the automated notification system from Nodemailer to AWS SES SDK, improving email deliverability and leveraging cloud infrastructure for scalable user communication.
 - Developed a responsive landing page focused on security-centric design principles, ensuring clear data hierarchy and professional trust for cybersecurity clientele.
 - Collaborated closely with senior developers to architect and maintain enterprise-grade web applications and frontend dashboards using Next.js and Tailwind CSS.
 - Actively participated in code reviews, adhering to strict team coding standards and migrating legacy routing structures to modern, optimized conventions.
 - Participated in Agile development rituals, including sprint planning and daily stand-ups, contributing actively to project workflows.
-
